Version: 2.0 A Full
Valid from: 2025 09 01
Valid to: 2026 01 31

Welcome to Steelwrist 2025 - 20 years of commitment to excavator efficiency

First and foremost, a heartfelt thank you to our valued customers and partners. Looking back at 2024, we are encouraged to see a continued growing interest in our products globally. We have continued to invest heavily in our local organizations around the world to ensure that you get the best possible support and parts availability. In a year of both growth and challenges in different parts of the world, your continued trust and support have been crucial, and we are truly grateful for that!

Expanding the global industry standard for automatic couplers with Open-S

Our ambition to give machine operators and contractors the freedom to combine quick couplers, tiltrotators, and work tools from different manufacturers following the Open-S standard is quickly gaining ground globally.

In 2024, the total number of members in the Open-S Alliance—of which we were one of the initiators—doubled. Today the organization has 14 members, both attachment manufacturers and global OEMs. All Steelwrist SQ products follow the Open-S standard for automatic couplers for excavators.

2025 – an exciting year ahead

In 2025 we will again attend the world's largest exhibition in our industry - Bauma, in Munich, April 7-13 and we will bring several exciting news to the show. We will continue rolling out our third generation tiltrotators with the launch of two new models. We are also introducing our SQ technology to excavators below 6 tons with the launch of the SQ40. The SQ40 enables quick and effortless changes of high-flow-powered work tools for smaller excavators, offering the same efficiency and convenience as the larger SQ coupler sizes. The SQ40 will be complemented by a range of powered work tools specifically optimized for this interface. This means that the price list will be updated with new products as from mid April.

Stay tuned—follow us for more updates

We are also seeing rapid growth in our social media community on Instagram, Facebook, YouTube, and TikTok, where we regularly post updates. Connect with us through one of these channels or visit our website at www.Steelwrist.com to stay updated.

After 20 years in business, our journey is just beginning. We invite you to join us as we continue to drive the industry forward and enhance excavator efficiency.

The Steelwrist team.

Note: Prices in this price list are based on trade tariffs in effect as of January 31, 2025. Should new tariffs or duties be introduced, pricing may be subject to change.

Interface type

Direct fit vs. Sandwich

Sandwich configuration

In a sandwich configuration a machine quick coupler is first mounted on the dipper arm of the excavator.

The top of the tiltrotator then has the same type of bracket as a bucket which means that it can be picked up with the machine quick coupler.

This is often used for excavators 14 ton and above and where work tools like hydraulic breaker is used frequently.

Direct fit

In a direct fit configuration the tiltrotator is permanently mounted to the dipper arm of the excavator.

Direct fit is common on compact excavators, and on couplers with high building height like CW and Universal.

Symmetrical vs other standards

Symmetrical type (S)

Weld on S-Adaptors

About quick coupler standards

All Steelwrist products are available with interfaces following the symmetrical standard. However, we also deliver products with dedicated Lehnhoff (HS) and Verachtert (CW) interfaces. All SQ products follow the symmetrical standard Open-S.

Symmetrical (S-type)

Lehnhoff type (HS)

Verachtert type (CW)

Steelwrist SQ Adaptors

Connecting work tools efficiently

Connecting the tiltrotator or work tools in an efficient way is always a good idea. Regardless if you are looking to safeguard proper maintenance by connecting to a central lubrication system, or if you are chasing seconds when changing work tools we have the solution that you need.

The main reason to go for SQ couplers or a tiltrotator with SQ bottom is when the work requires many work tool changes. Regardless if you need an adaptor plate or a weld on bracket we have the cost effective brackets that you need.

All male couplings in the SQ adaptors includes the Qplus™ technology giving your work tool higher flow capabilities and more uptime. Our SQ adaptors build on the Symmetrical (S-type) standard with the addition of oil couplings. Steelwrist SQ adaptors therefore work perfectly with other manufacturers having the same dimensions and positions.

Steelwrist Buckets and Work Tools – Custom Build

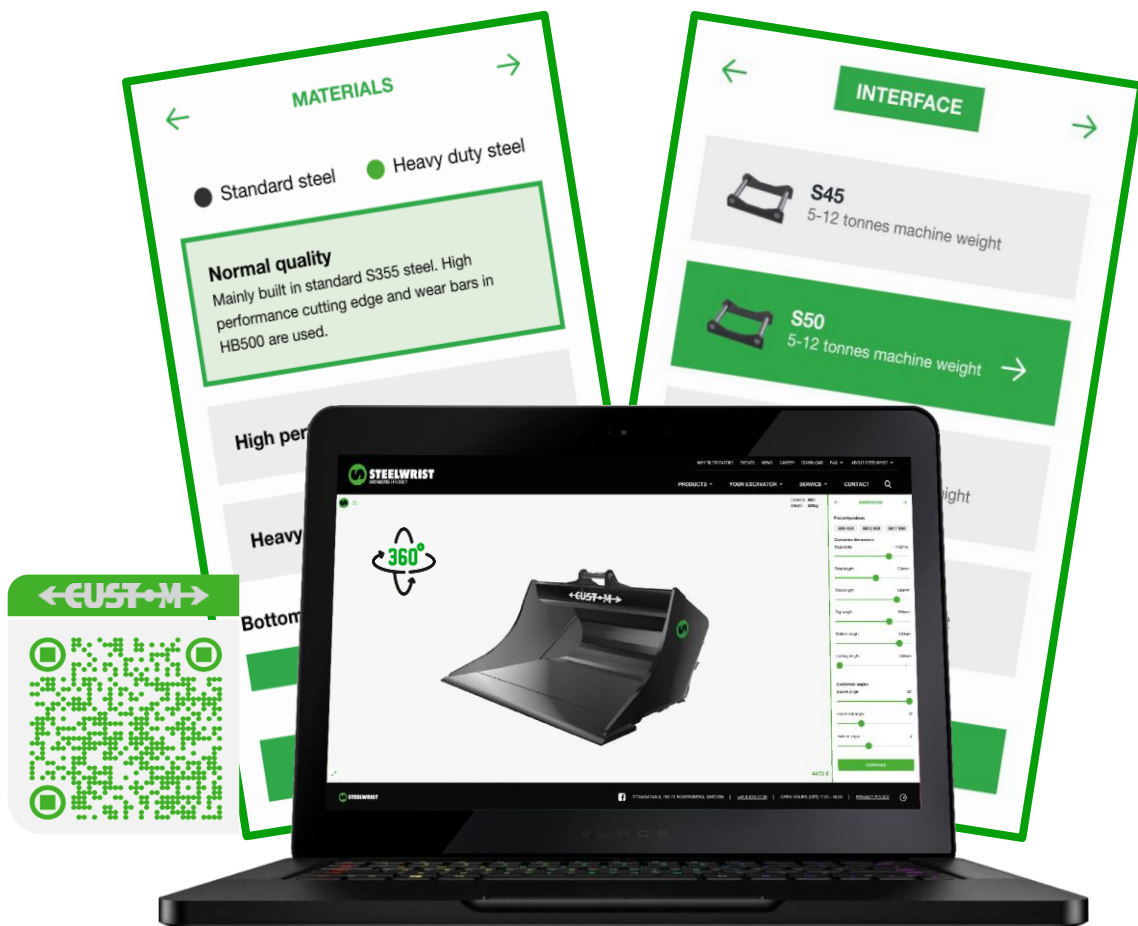

Design your own buckets!

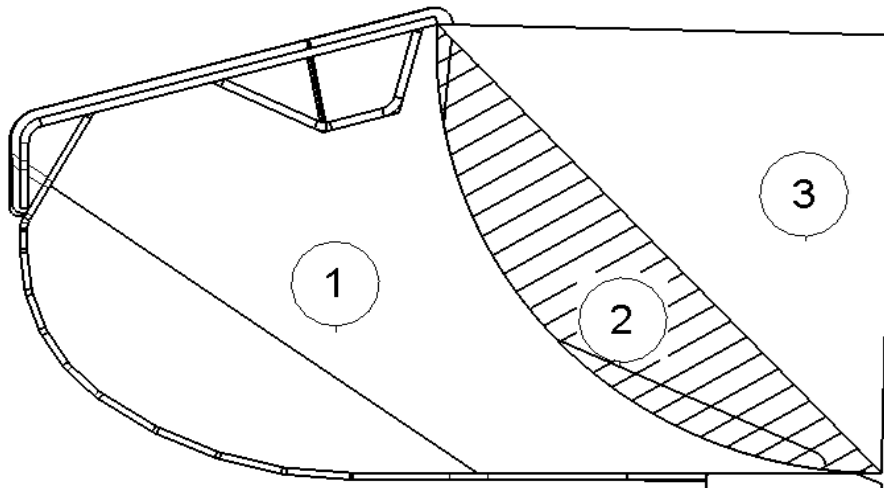

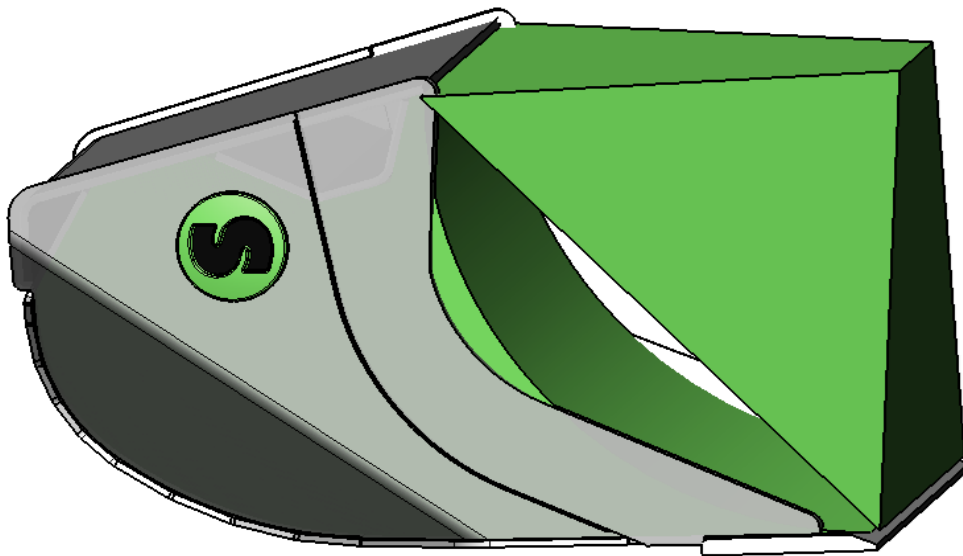

**If I only had that specific bucket shape then I would be able to do this job much faster...
Ever had that feeling?**

We know that many experienced operators may have specific needs! As a technology leading work tool supplier we have the tools available so that you can design your own custom built bucket online. Super easy!

Visit our homepage at custombuild.steelwrist.com/ and design your own bucket.

You can shape the bucket to your own desire, add teeth and determine material specifications. Price will adjust automatically depending on your choices. Once you have fixed the design and paid we will manufacture the bucket and ship it to the address of your choice.

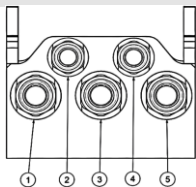

ISO Volume = ① + ③

SAE Volume = ① + ② + ③

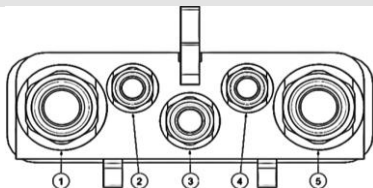

All volume information based on SAE measurement.
Measurement according to SAE gives approximately 25-30% more volume.

Open standards make everyday life easier, whether it's plugs for electrical sockets, computer connectors or excavator quick couplers. Open-S also builds on the independent and established standard that already exists for quick couplers, the S Standard.

Stefan Stockhaus, CEO Steelwrist AB

Notes

Handwriting practice lines consisting of 20 horizontal dashed lines.

Notes

Handwriting practice lines consisting of 20 horizontal dashed lines.

Open-S – the open industry standard for fully automatic quick couplers for excavators.

The purpose of Open-S is to provide global interchangeability between quick couplers, tiltrotators and work tools from different manufacturers. Read more at www.opens.org
